EDUCATION

Politeknik Negeri Indramayu (Polindra)

Indramayu, Indonesia

Informatics Engineering, D4 Software Engineering | GPA 3.67/4.00

August 2024 – Present

- Relevant Courses: Web Programming, Database Systems, Systems Administration, Computer Networks.
- Student Organizations: Robotics Team, Journalism Community, Student Consultative Assembly (MPM)

PROJECT PORTFOLIO

1.ReRe PetShop – Multi-Platform Retail Solution (Laravel, React JS, Flutter, MySQL)

- Developed a comprehensive e-commerce platform for pet product needs, including product catalog features and secure payment system integration using Midtrans.
- Built an integrated multi-platform ecosystem to provide a seamless user experience.

2. SOFTCOMP – HIMA-RPL Competition Platform (Laravel, MySQL)

- Developed the HIMA RPL competition registration portal as a unified information center facilitating registration, event schedules, and announcements.
- Designed a responsive interface that simplifies the registration workflow and optimizes data management.

3.SMAIT Bunayya Alumni Association Website (React JS, GSC)

- Developed an alumni networking platform that facilitates connections between alumni through distribution mapping features, activity information centers, and communication forums.
- Integrated a centralized information system to facilitate alumni data management and increase community engagement.

4.Pocket Radar: Personal Finance Tracker (Flutter)

- Developed a personal finance tracking application to help users manage expenses and income efficiently through budget planning and cash flow monitoring features.
- Integrated a visual dashboard for financial reports and bill reminder notification features to ensure user financial management remains organized.
